Postal Connect for FP Postage Meters is a way to manage all of your postage meter data from an online portal. Where ever you have an internet connecting you have access to your data. Keep track of your MailOne accounts, addresses, postage, requests, registers, and tracking info by automatically syncing to and from MailOne.

All your MailOne data from Accounts and Addresses, to Postage and Tracking can be viewed and filtered by a myriad of options from date ranges to class of mail and a whole host of other options. Working with MailOne has never been easier.

Keeping track of MailOne Tracking; know when and where your mail went. Combined with a USPS tracking number for even more precision.

Any manual importing back into MailOne is made simple by being able to download MailOne compatible import files. These can be filled with your Account, Addresses, and/or your Postage data.

Create your own custom reports to view your data exactly as you need it. Capable of exporting the reports in a convenient .csv format. Postal Connect also lets you print page and label reports for your MailOne requests.
