- Download postage data and registers from Vision to import into your Cost Recovery Software.
- Formats Vision file for Customers existing cost recovery format.
- Run from a simple desktop link.
- Run as scheduled task.
- Includes checks to prevent duplicate postage.

Form and Postal Utilities Cost Recovery Connector for Vision software automates the recovery of office mailing expenses by synchronizing postage data between the FP postage meter and a firms cost recovery system (i.e. Copitrak, Equitrac, ProLaw...).

With Vision and FPU Cost Recovery Connector software a firm can easily improve the efficiency and accuracy of recording and recovering client billable expenses related to their FP postage meter.

CRC includes an extensive history log to quickly diagnose system status.

Downloaded Vision postage data can be automatically formatted and imported it into a cost recovery or accounting system. Includes checks to prevent duplicate postage exports and can apply chargeback in numerous ways.

It is also capable of exporting virtually any file type, and can be scheduled to automatically run one or more times a day. The user can run the process any time via a desktop icon.

Supports export filtering to exclude charges that are not billed back.
