Form and Postal Utilities Mail Request greatly improves accuracy and efficiency by having a user enter shipping and/or mailing details on a desktop to create a barcoded slip.

Once scanned at the postage meter MailOne is automatically setup for that shipment. (i.e. account, ship to address, weight & postal product).

The desktop form is designed for ease of use, by remembering as much previously entered data as possible.

- Assign a Recipient ID which saves Name, Address, Email, and Phone for future use.
- Enter a zip and it auto fills the city state.
- The product list dropdown can be limited to a specific set of rates.
- Generates a barcoded report or label to attach to the item to be mailed.
- Accounts and addresses are automatically synced to FPU Ship Request and MailOne.

There is a certified mail add on that prints individual PS 3800 and provides a daily PS 3655 or 3877.
